

Environmental Policy

Office

Hire Contracts and quotations are where possible, sent by email, thus saving large quantities of paper.

We no longer use multi leaf glossy brochures; all is available to view online.

Energy and water

We recycle water in a multi tank system, to jet wash our track mats.
We manufacture our own concrete weights. This means less water weights are used, to further reduce our water usage.

Transportation

We have HGV's for delivering larger contracts, in place of multiple smaller 7.5 tonne lorries, or multiple vehicles with trailers.
We load vehicles for multiple jobs in order to reduce our transport miles.

Day to day operations

Our basic event carpet is recycled for multiple events.

We recycle PVC covers; we make panoramic window walls from old plain and Georgian window walls.

Timber is sourced from our local timber yard, cut to lengths required pre-purchase to save wastage.

We take pride ensuring we are as self- sufficient as possible, manufacturing and maintaining all of our own stock. PVC covers are cleaned on site here with our wonderful PVC washing machine, which is permanently manned, electrics are fixed in house and furniture mended by our capable team.

Buchanan Events Ltd Environmental Policy. Southern Trackway is a wholly owned subsidiary of Buchanan Events Ltd.
